JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

February 6. One new case of yellow fever announced in Habana to-day.

February 5. The yellow-fever patient at Habana, reported by cable February 4, is a Spaniard who has been in the island over a year, and has been employed for a month and a half. He was taken ill January 27, and was without treatment until January 28, when he went to La Benefica Hospital for treatment. He was seen by the board of experts January 29, and kept under observation until February 4, when his case was diagnosed as yellow fever. The necessary precautionary measures have been taken to prevent a spread of the disease.

February 6. The board of experts to-day unanimously confirmed the original diagnosis in the case of yellow fever reported in my cablegram of February 5. The board also saw another case and declared it to be one of yellow fever.

Report from Matanzas—Inspection of vessels—Summary for month of January, 1908.

Acting Assistant Surgeon Uñes reports, February 3:

Week ended February 1.

Bills of health granted to 5 vessels clearing for the United States.

There were no cases of quarantinable diseases reported within this district for the past week.

During the month of January, 20 bills of health were issued to vessels leaving for the United States, having 444 members of crews and 46 passengers, of which 45 were in transit for various ports in Cuba and 1 for Galveston, Tex.

There were no transactions for the Canal Zone nor for the Republic of Panama.

The health of the city for the past month has been fairly good. No quarantinable diseases were reported either in the city or province.

Report from Santiago—Inspection of vessels—No new cases of yellow fever—Work of fumigation continued.

Acting Assistant Surgeon Wilson reports, January 28:

Week ended January 25. Bills of health issued to 7 vessels bound for the United States. No vessel fumigated. No quarantinable disease reported. Several nonimmunes have been under observation, but no new case of yellow fever has been reported. The work of fumigation is continued.
